

TV TECHNOLOGY ASIA PACIFIC

SERVING BROADCASTING & PRODUCTION PROFESSIONALS THROUGHOUT ASIA

TV Technology Asia/Pacific's editorial and circulation is focused directly at broadcast stations and the leading production houses in the region. In 2008, building on its already strong reputation, **TV Technology Asia/Pacific** offers more content tailored to the needs of technical management, engineering and production personnel, including:

LOCAL & GLOBAL CONTENT: With regional offices in Beijing and Tokyo, and editorial representation in Sydney, Singapore, and Hong Kong, **TV Technology Asia/Pacific** publishes the best stories, local and global, to help readers do their jobs better. Hong Kong-based freelance broadcast consultant Craig Norris, who joined our staff in 2006 as Technical Editor, will continue to help the magazine focus its content on issues directly relevant to the regions' broadcasters. And, using NewBay Media's worldwide network of offices, editors and freelancers, **TV Technology Asia/Pacific** also offers the reader a unique global video technology perspective.

TRANSMISSION & TECHNOLOGY: **TV Technology Asia/Pacific** publishes a regular technical DVB transmission column (a must-read for the region's engineers), along with regular columns from experts around the world covering such topics as server technology, video to mobiles, IPTV, audio for broadcast and compression. **TV Technology Asia/Pacific** is the only technical, engineering-based publication serving the region.

NEWS, SPORT & BEIJING OLYMPICS: Our well-established news & sport section will continue to offer unparalleled technology coverage of the overall news market, and focus on several key sporting events as well. From lenses for getting up close and personal on

the pitch, to newsroom systems that get breaking news to air, **TV Technology Asia/Pacific** will continue to blanket this section of our industry.

We'll also cover the run up to the big Beijing Olympics, and **TV Technology Asia/Pacific** editor Mark Hallinger will be on site at the Games to get the inside story of how the world's broadcasters captured and delivered the first truly HD Summer Games.

THE MODERN FACILITY: Written by a consulting engineer, this regular feature will examine the issues faced by facility management and engineering personnel on a variety of issues. We'll consider what it really takes to be a modern facility in terms of IT issues,

Asia-Pacific's Broadcast Technology Magazine
Your Core Market Is Our Core Market: Content and Circulation Focused on Asia's Broadcast and Professional Production Markets
Now Even More News, Sports, IPTV and Video to Mobiles Coverage

news production in a multi-delivery world, archiving, post, and more. We'll also profile the technology behind some of Asia's most compelling facilities.

2009 INTERNATIONAL VENDOR & PRODUCT DIRECTORY: Following the launch of our International Vendor & Product Directory in 2007, **TV Technology Asia/Pacific** will again provide our readership with a keep-all-year definitive source of information for the professional video and television industry. The 2009 Vendor & product Directory provides a wealth of valuable information that buyers need to make purchasing decisions. This vital sourcebook will contain an alphabetical listing of manufacturers, dealer and distributor listings, and a cross-reference by product category.

HD PRODUCTION: **TV Technology Asia/Pacific** will feature HD technology in every issue. Content will include case studies from the region and abroad, plus technical columns and product reviews. From the

growing use of HD video in post applications to HD acquisition and manipulation, we'll cover the stories.

CHINA WATCH: The Asia region is watching developments in China, now more than ever before. **TV Technology Asia/Pacific's** 'China Watch' feature draws on its sister Chinese-language magazine, **Broadcast & Production/China** and its staff, to provide up-to-date English language coverage of this important market.

FOCUSED READERSHIP: **TV Technology Asia/Pacific** blankets the region — and the broadcast networks and stations. In addition to delivering readers throughout Southeast Asia, Australia and New Zealand, **TV Technology Asia/Pacific** has increased its circulation in countries such as India, South Korea, Hong Kong and Taiwan in response to favorable market conditions. Our circulation is deep at the broadcast stations and in the countries that are on the move in terms of new equipment projects.

TYPE OF BUSINESS

NewBay Media educates professionals in audio, musical instruments, video, broadcast, systems installation, and K-12 Education with the information they need to excel in their business by providing dynamic, inspired, creative, interactive awareness to readers, advertisers, associations and other partners around the world. Built upon an information network of award-winning magazines, online communities, and conferences and events, NewBay Media reaches more professionals worldwide in print, in person and online.

ADVERTISING MATERIAL SPECIFICATIONS

TV Technology Asia/Pacific is printed sheetfed. Paper stock for the cover is 157gsm LWC (gloss). Paper stock for the text pages of the publication is 80gsm art paper (gloss). Binder is saddle stitched and trimmed. 150 halftone line screen is recommended for best results. Color reproduction cannot be guaranteed if color density exceeds 280%. Color proof must be supplied with all advertisements to ensure quality control.

Note: Advertisements that have excessive use of dark colors may print with heavy dot gain, resulting in a darker outcome than represented on the original color proof.

Digital File Specifications:

TV Technology Asia/Pacific is printed using CTP (Computer-to-Plate) process. We request that all ad copy be supplied as digital files rather than film. The following specifications are to be followed.

Formats we accept:

QuarkXpress – up to v.6.5

Adobe Photoshop – up to v.7.0

Adobe Illustrator – up to v.10.0

- All applications must be used in accordance with the manual instructions for 4-color printing. A hard copy or low resolution pdf is required with all files.
- **IMAS Publishing's production department works in a Macintosh environment**, therefore PC fonts are not compatible and cannot be accepted.
- If any file format is used other than the programs indicated above, a fee will be charged for additional work time. A file may be refused if it is not compatible.

Digital Media we accept:

CD ROM

ZIP 100MB/250MB

Graphic file formats:

- Resolution must be 300dpi. If resolution is lower than this, IMAS will not be responsible for the printed quality of the image. (Images above 300dpi will not improve image quality in print, it will only make the file larger.)
- Graphics taken from the Internet must be used at their original size – enlarging dimensions or increasing resolution will result in bitmapped images.

Graphic formats we accept in CMYK, high-resolution 300dpi:

- PDF - Acrobat v. 4 & 5 only (i.e. v. 1.3 or 1.4) *(We cannot accept v.6, as it is not compatible with Quark)*
- TIFF
- EPS
- JPEG

Pre-Flight:

FLIGHTCHECK® is the recommended program for pre-flighting all files. Files should be collected with all supporting art in CMYK format and all fonts used within the file. Failure to supply all components or supplying incompatible files could result in delays and production fees.

Electronic transfer—we accept files via:

- Email – Send files to the sales support person listed below.
- FTP – Contact your sales representative for address, username and password.
- All files must be compressed (i.e. Stuffit, Zip) before sending. Please supply a hard copy of the file by fax with complete file specifications along with a contact name.

Problems? If you have any additional questions, please contact the production ad traffic manager via e-mail: lrichards@nbmedia.com
